Fire & Ice: Exploring Iceland will provide a more in-depth, hands-on look at the dynamic processes forming the island of Iceland and the native culture. We will explore active volcanoes, glaciers and other geomorphic features, taste local food and more. Key geologic activities include visits to active volcanoes and glaciers in two of Iceland’s National Parks and hikes to two waterfalls and a black pebble (volcanic) beach. A visit to a geothermal plant and a native fishing village will provide insight into how the Icelanders have learned to live in such a dynamic environment.

Students will be hiking on lava flows, pebble beaches, snow, ice, glaciers and along waterfalls.
OAKS Course:
Ready to learn more about studying abroad? Self-register for our Study Abroad 101 OAKS Course! Once you log into OAKS through MyPortal, click on Self Register in the top right corner. Select Study Abroad 101 and review all of the modules and learn more about study abroad!

Please Note:
- FYE Abroad does not count towards the FYE graduation requirement
- Earn CofC elective credit towards graduation
- Does not impact tuition rate if enrolled full time (12-15 credits) during the spring semester

Student Quote:
"I loved this trip so much! It was so fun to experience a country no one really thinks of going to for spring break! Also I made lots of new friends and all of the excursions and adventures were so thrilling and enjoyable!"
- Spring Break 2019 participant
